

Axel Scheffel & Ingrid Dubotzky

Spring has just started and the *Baselworld* is just around the corner. Once again this year we have real highlights in store for you.

Tubo has become one of our trademarks and we are now extending this successful collection with *Tubo Rotondo*. Sporty and casual but at the same time elegant and available in many variations, *Tubo* has a lot of admirers. The focus of the new line is on rounder shapes and more volume. The wearing comfort remains the same: simply slip over the arm and the bangle will sit perfectly on every wrist. The new rings and earrings are also eye catchers.

Loop stands for extravagance and the ultimate in aesthetics. With its unique design, this sophisticated collection will appeal to every individual customer.

Visit us from March 27 to April 3. As always you will find us in hall 2.1 directly next to the escalator at stand F21.

We look forward to seeing you!

Your Ingrid Dubotzky and Axel Scheffel

Tubo Rotondo

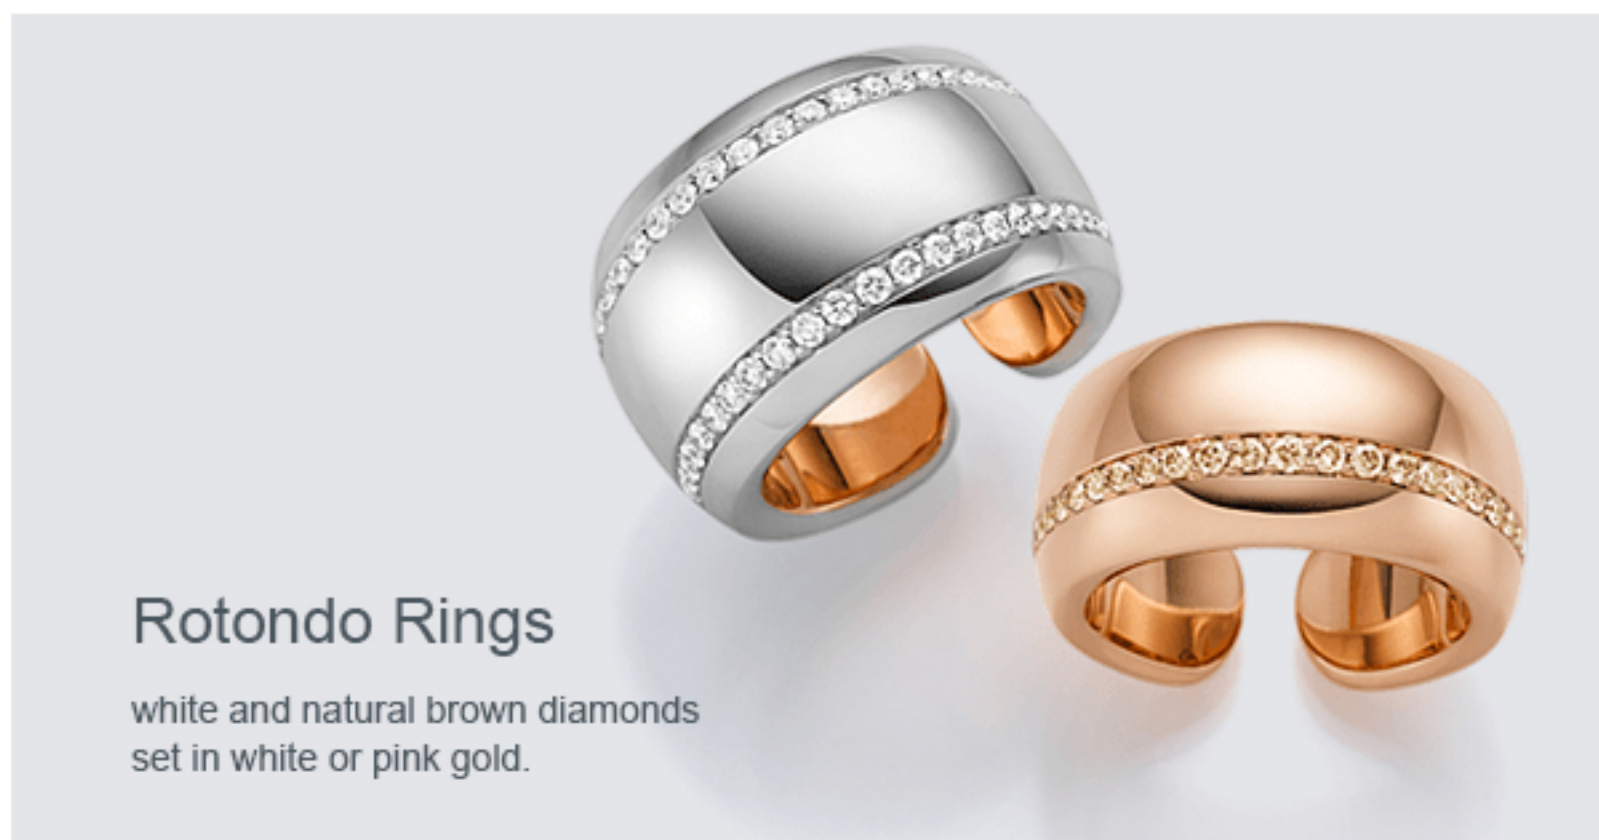

Curves and soft shapes are characteristics of *Tubo Rotondo*. The semi-circular profile underscores the new look and, worn together with other bangles in the *Tubo* collection, creates variety and interest.

Tubo Rotondo Bangle

out of steel or pink gold with inside spring mechanism and natural brown diamonds set in pink gold or white diamonds set in white gold.

All *Tubo* bangles are available in different sizes and in red gold or stainless steel. The ends are embellished with a row of diamonds or set in pavé; look forward to a surprise

Rotondo Rings

white and natural brown diamonds set in white or pink gold.

In line with the design of the arm jewellery, the rings are also not completely closed. The use of two colours in the ring is a special feature. The little secret that only the wearer knows enhances the quality of the jewellery piece. Large earrings in a range of diameters perfectly complement the picture.

Rotondo Earrings

natural brown diamonds set in pink gold.

Right on trend: a really dark and deep anthracite grey. The latest PVD coating is called *gun metal*.

Tubo Rotondo Bangles

PVD coated steel with inside spring mechanism and white diamonds set in white gold or natural brown diamonds set in pink gold.

Strikingly different

Not just the form but everything about this piece of jewellery is unique. Experience and skill in handling wood and mineral materials are what make this complex design possible. Development and production are also extremely sophisticated processes.

Loop Bangle and Ring

out of Juma with white diamonds set in white gold.

Come to see our beautiful novelties.

BASELWORLD
